

NAME: Adrias, Angelica S.

SUBJECT: 6ADET

MOCKUP

Step A: Color Scheme

```
import 'package:flutter/material.dart';

final scheme = ColorScheme.dark(
  primary: const Color(0xFF0F4C5C),
  onPrimary: const Color(0xFFF1F5F9),
  secondary: const Color(0xFF8B1E3F),
  onSecondary: const Color(0xFFF1F5F9),
  surface: const Color(0xFF16313A),
  onSurface: const Color(0xFFF1F5F9),
  error: const Color(0xFFC1121F),
  onError: const Color(0xFFF1F5F9),
);
```

ROLE	HEX	USED FOR
Primary	#0F4C5C	Main buttons, active states, app bar
On Primary	#F1F5F9	Text and icons on primary
Secondary	#8B1E3F	XP highlights, selected answers, important effects
On Secondary	#F1F5F9	Text and icons on secondary
Surface	#16313A	Question cards, information cards, menus
On Surface	#F1F5F9	Body text, questions, labels
Error	#C1121F	Wrong answers, damage, defeat messages
On Error	#F1F5F9	Text and icons on error
Background	#081C24	App background

Contrast Ratio: **15.95:1**

Body text: **#F1F5F9**

Background: **#081C24**

Theme: **Dark Only**

Step B:

```
const textTheme = TextTheme(
  headlineSmall: TextStyle(
    fontSize: 28,
    fontWeight: FontWeight.bold,
  ),
  bodyMedium: TextStyle(
    fontSize: 18,
    fontWeight: FontWeight.normal,
  ),
  labelSmall: TextStyle(
```

```

fontSize: 14,
fontWeight: FontWeight.normal,
),
);

```

YOUR STYLE	FLUTTER SLOT	SIZE	WEIGHT	USED FOR
Heading	headlineSmall	28sp	Bold	Screen titles, battle result titles
Body	bodyMedium	18sp	Regular	Programming questions, menu text
Caption	labelSmall	14sp	Regular	HP values, XP, hints, small labels

Step C:

```

class AppSpacing {
  static const double xs = 4;
  static const double sm = 8;
  static const double md = 16;
  static const double lg = 24;
}

```

Spacing	Value	Used For
Base unit	8px	Main spacing unit
Tight spacing	8px	Related items
Standard spacing	16px	Sections and cards
Screen edge spacing	24px	Main screen content

Step D:

COMPONENT	FILE	CONSTRUCTOR PARAMETERS	APPEARS ON
Primary Button	lib/widgets/primary_button.dart	String label, VoidCallback? onPressed	Main Menu, Profile Screen, Result Screen
Info Card	lib/widgets/info_card.dart	String title, Widget content, IconData? icon	Main Menu, Profile Screen, Result Screen
Hp Bar	lib/widgets/hp_bar.dart	int currentHp, int maxHp, String label	Battle Screen
Question Card	lib/widgets/question_card.dart	String question, List<String> choices, int? selectedIndex, ValueChanged<int>? onChoiceSelected, VoidCallback? onAttack	Battle Screen
Header Title	lib/widgets/header_title.dart	String title, String? subtitle	Main Menu, Profile Screen, Battle Screen, Result Screen

Step E:

```
// lib/theme.dart
import 'package:flutter/material.dart';

final scheme = ColorScheme.dark(
  primary: const Color(0xFF0F4C5C),
  onPrimary: const Color(0xFFF1F5F9),
  secondary: const Color(0xFF8B1E3F),
  onSecondary: const Color(0xFFF1F5F9),
  surface: const Color(0xFF16313A),
  onSurface: const Color(0xFFF1F5F9),
  error: const Color(0xFFC1121F),
  onError: const Color(0xFFF1F5F9),
);

const textTheme = TextTheme(
  headlineSmall: TextStyle(
    fontSize: 28,
    fontWeight: FontWeight.bold,
  ),
  bodyMedium: TextStyle(
    fontSize: 18,
    fontWeight: FontWeight.normal,
  ),
  labelSmall: TextStyle(
    fontSize: 14,
    fontWeight: FontWeight.normal,
  ),
);

class AppSpacing {
  static const double xs = 4;
  static const double sm = 8;
  static const double md = 16;
  static const double lg = 24;
}

final appTheme = ThemeData(
  useMaterial3: true,
  colorScheme: scheme,

  textTheme: textTheme,

  cardTheme: const CardThemeData(
    margin: EdgeInsets.all(AppSpacing.sm),
  ),

  filledButtonTheme: FilledButtonThemeData(
```

```

style: FilledButton.styleFrom(
  minimumSize: const Size.fromHeight(48),
),
),
);

```

WHAT CHANGED AND WHY:

ELEMENT	PRELIM	NOW	WHY IT CHANGED?
Palette	Six hand-picked colors	Flutter ColorScheme with named roles and hex values	I kept the original battle palette but converted it into roles that can be used directly in ThemeData.
Typography	28sp Heading, 18sp Body, 14sp Caption	headlineSmall, bodyMedium, and labelSmall	The sizes already worked in the prelim, so I kept them and changed them into reusable Flutter TextTheme styles.
Spacing	8px spacing system	AppSpacing constants for 8px, 16px, and 24px	The 8px system was consistent, so I kept it and made the values reusable in code.
Components	Five components with screen appearances	Five components with file paths, constructor parameters, and exact screen mapping	The prelim component table became unclear toward the end. The mockup made it possible to define exactly what each widget receives and where it appears.
Theme	Color and text decisions were documented separately	Complete theme.dart structure	I have now worked with ThemeData in M4, so the design system can be written in a form that can be used when the project starts.
Dark mode	N/A	Dark Only	The mockup uses the dark battle game visual style on all four screens, so I am committing to one theme instead of leaving the decision for later.
